

CDS

CUSTOMER DIRECT SHIP

Ship Directly to Your Customer from the Anchor Warehouse.

The CDS Program is designed to easily ship product from Anchor’s warehouse directly to your customers. Below are some features and the fee schedule of this program.

Pick slips

We offer a customized pick slip where our Anchor logo is removed and only your name and address will appear. This drop ship pick list will show only the title, ISBN or UPC, and quantity. It will not show postage, retail prices, or discounts.

Ease of ordering online

You can enter your CDS orders conveniently online at www.anchor distributors.com. It’s easy to do. At the checkout page simply select the “CDS Customer” box, then add a new address, select a previously used address, or change a previously used address. You can also get freight quotes on the different shipping methods available. Personalize the pick slip with a note to your customer – this feature is only available on web entry in the checkout screen.

We are x-12 EDI compatible, and also can use web services to receive orders. If you are capable of transmitting orders this way, please contact us for further information.

An additional \$2 manual processing fee will be incurred if our staff keys in the order.

Tracking information

If you would like the tracking number emailed to you when a package ships, please contact your sales

territory manager to set up this feature on your account. Your customers will appreciate the special service when you forward this tracking information to them.

Save Time and Money!
